

Week 5 Software Progress Report

Kimberley Hayward

Due to hardware problems last week our memory chip with our code on it broke and therefore we had to copy our code onto the new replacement chip. The code that we put on was not fully up to date and therefore I had to update it which included adding the networking code back in. We had a problem that our code returned the error 'Warning: Deprecated conversion from string constant to 'char*' which we fixed by adding 'const' to three of our 'extern' lines with the help of Michael. Campbell started writing code for the third quadrant which we are still in the process of finishing and testing.

- Could not connect – IP address changed to 10.140.108.152
- I edited the code to make it correct after when we had to replace the memory card and put the code back on it
- Campbell is drafting code for quadrant three
- Had an error that we missed 'const' after 'char' in three lines of our code which caused out
